

Picking solutions

Picking solutions for Supply Chain & Internal Logistics

Order-picking is a vital step in the supply chain. After all, efficient order-picking processes can save both time and money. Every single one of our order-picking solutions is designed to maximize efficiency in the selection, picking, and handling of items.

What if the speed of your logistics line was no longer dependent on the speed of your operators? Our order-picking solutions facilitate an automated process – so your operators move from executing the tasks themselves to monitoring the process.

Explore all our order-picking solutions for Supply Chain & Internal Logistics.

Pick-to-Light system

- Up to 5.000 orderlines per hour
- Sort in the flow
- Robust and solid

Put-to-Light system

Benefits

Reduced error margins

- Since orders are now selected and transported by a computer-controlled system rather than by operators, the risk of errors will be reduced to a minimum

Improved efficiency

- Operators no longer need to navigate large halls to pick each product manually. Thanks to our order-picking solutions, this process is performed in less time and takes up less floor space

Data analysis

- Not only is all the data stored, it is also analysed in order to continuously improve the process

Simple integration

- Our order-picking solutions can be integrated into both new and existing lines

24/7 Service

Our excellent service ensures that your installations are always operational. ARCO's service commitment goes beyond designing, building, and installing machines and installations. With our team of service technicians and service vans, we are committed to ensuring continuity for every customer. We offer a range of services – from our Service Level Agreements (SLA) to spare parts, maintenance, repair and 24-hour emergency services – that are designed to help keep your organization up and running.

Turn-key solution for picking:
