

Inbound solutions

Inbound solutions for Supply Chain & Internal Logistics

Many logistics processes are highly dependent on movement within the process. Before packages are processed and transported, they must first arrive at the warehouse.

ARCO provides various solutions to efficiently organise the inbound process to achieve the highest possible capacity with the best possible result. These include:

Material handling

- Roller conveyors (modular)
- Conveyors belts
- Unload conveyors
- Telescope conveyors
- Scissor conveyors

After the goods have been unloaded and transported in the warehouse, there are often several actions in the flow of a logistic process. Here too, ARCO provides various efficient options, such as:

Labeling / Scanning

- Print & Apply
- Print & Pouch
- Different types of scanners

Sorting/ Vertical transport

- Zipp sorter
- Crossbelt sorter
- Transfer unit
- Diverter
- Lifts / Spiral conveyors

Ask our experts about the possibilities for your application and see what our machine can do for you.

Benefits

Return on investment

- Easy to minimize operators

Combination of inbound processes

- It is also possible to install multiple inbound systems in sequence, thereby optimizing the flow of goods

Tailored-made product

- Not all products can go through the same inbound process. We look for the most suitable inbound procedure for each product or product type so as to prevent product deformation and process delays

Good product distribution

- Our inbound solutions offer a fast and efficient way to distribute goods evenly throughout the process, which, in turn, keeps downtime and product blockages to a minimum

24/7 Service

Our excellent service ensures that your installations are always operational. ARCO's service commitment goes beyond designing, building, and installing machines and installations. With our team of service technicians and service vans, we are committed to ensuring continuity for every customer. We offer a range of services – from our Service Level Agreements (SLA) to spare parts, maintenance, repair and 24-hour emergency services – that are designed to help keep your organization up and running.
